EXECUTIVE OVERVIEW

Alpha Synergy Industrial Solutions LLC is a UAE-incorporated industrial procurement and supply specialist headquartered in Sharjah. We connect customer demand across the UAE and GCC with qualified manufacturers and distributors in the UK, USA, Europe, China, India, and Asia.

Our team manages the procurement lifecycle from RFQ review and vendor sourcing through documentation, freight, customs coordination, final delivery, and post-delivery support. The operating model is designed for projects where specification accuracy, traceability, commercial clarity, and delivery certainty are critical.

POSITIONING

01

Global sourcing

Multi-region vendor access and competitive procurement.

02

Technical discipline

Specification review, document control, and traceability.

03

Delivery ownership

Freight, customs, Incoterms, and destination coordination.

04

Group capability

Cross-border support through the AiTech Synergy Group.

Operating principle

Right product. Right documentation. Right destination. Delivered with accountable execution.

Purpose, values, and commitment

A disciplined commercial culture built around trust, technical competence, and reliable execution.

V

Our vision

To be an industrial supply partner respected by customers for optimized solutions, by partners for inclusive growth, by employees for development, by suppliers for fairness, and by stakeholders for sustainable value.

M

Our mission

To source and deliver best-in-class industrial, electrical, mechanical, automation, and telecommunication materials through global procurement expertise, timely execution, reliable supply, and competitive pricing.

Five values that guide every engagement

01

Integrity

Transparent, ethical commercial conduct.

02

Innovation

Better sourcing and execution methods.

03

Excellence

Quality in products, documents, and service.

04

Client focus

Responsive ownership from RFQ to delivery.

05

Global reach

International access with local coordination.

OUR COMMITMENT

We build long-term business relationships through clear specifications, verified supply channels, disciplined documentation, proactive communication, and consistent delivery of commercial value.

Supplier or product deviations are identified clearly before order placement. Project-specific certifications and documentation are confirmed during quotation review.

End-to-end procurement support

One accountable workflow from requirement review through final delivery and after-sales coordination.

01 RFQ review

Technical and commercial review of specifications, quantities, delivery points, and document requirements.

02 Vendor sourcing

Qualification and competitive sourcing across established regional and international supply channels.

03 Quotation management

Clear pricing, lead time, Incoterms, validity, warranty, and deviations.

04 Order execution

Purchase coordination, expediting, inspection follow-up, and progress communication.

05 Document control

COC, MTR, MDR, FAT reports, data sheets, certificates, and traceability packs.

06 Logistics and DDP

Freight, export documentation, customs coordination, and door delivery capability.

07 Technical coordination

Clarifications, equivalent product review, and manufacturer interface support.

08 After-sales support

Warranty coordination, spare parts support, and responsive issue resolution.

COMMERCIAL DISCIPLINE

Standard supply basis: DDP Sharjah, UAE (Incoterms 2020) where requested. Quotations can be issued in AED or USD, subject to RFQ requirements and supplier availability.

A controlled procurement lifecycle

Structured controls reduce ambiguity, strengthen traceability, and keep project stakeholders informed.

01**Receive**

RFQ, specifications, quantities, delivery and document requirements.

02**Validate**

Scope review, clarifications, approved makes and compliance requirements.

03**Source**

Vendor qualification, bid comparison and lead-time verification.

04**Quote**

Commercial offer with inclusions, exclusions and deviations.

05**Execute**

PO placement, expediting, inspection and document collection.

06**Deliver**

Freight, customs, DDP coordination and proof of delivery.

07**Support**

Warranty, spares, closeout documents and issue resolution.

DELIVERY OUTCOME

A complete, commercially clear supply package delivered to the agreed destination with traceable documentation.

Industries we serve

Experience across demanding industrial environments where quality, safety, documentation, and schedule performance matter.

ENERGY

Oil and gas - upstream and downstream

PROCESS

Petrochemical and chemical

UTILITIES

Power generation and utilities

OFFSHORE

Marine and offshore

BUILT ASSETS

Construction and infrastructure

INDUSTRIAL

Manufacturing and industrial plants

DIGITAL

Telecommunications and technology

MOBILITY

Aviation and transport

WATER

Water treatment and desalination

CLIMATE

HVAC and district cooling

PUBLIC SECTOR

Government and defence

SPECIALTY

Processing industries

Built for critical supply: from hazardous-area electrical materials and process instrumentation to mechanical, HVAC, safety, and maintenance requirements.

Electrical infrastructure

Core electrical materials for industrial, infrastructure, utility, marine, and hazardous-area applications.

01 Cables and wiring solutions

- LV, MV and HV power and control cables
- Instrumentation cables - PLTC and TC types
- Fire-resistant and high-temperature cables
- Foundation Fieldbus and process cables
- Solar PV and rubber flexible cables
- Cathodic protection and grounding cables
- Optical fibre, coaxial, LAN/UTP and telephone
- ACSR overhead conductors and metal-clad cables

02 Cable management systems

- EMT, rigid steel, GI and PVC-coated conduits
- Cable trays - aluminium, stainless steel, PVC and epoxy
- Flexible conduits, couplings and accessories
- Cable ladders, floor trunking and busbar trunking
- Cable glands - BW, CW, A2, A4, E1FW and E2FW
- Cable lugs, cleats, ties, bands, clamps and brackets
- Termination, splicing and earthing kits
- Insulation tapes, markers and ferrules

03 Electrical bulk and hazardous-area equipment

- Conduit bodies, outlet boxes, service entry fittings and cord fittings
- Connectors, couplings, unions, elbows, tees, reducers, bushings and nipples
- Ex-d flameproof fittings, hazardous-area conduit fittings and accessories
- Industrial plugs and sockets to IEC or NEMA requirements
- Fastening accessories including clamps, straps, clampbacks, washers and plugs

SPECIFICATION COVERAGE

CABLE CONSTRUCTION

Power, control, instrumentation, data, solar, fire-resistant, and special-purpose cables.

MATERIAL OPTIONS

GI, stainless steel, aluminium, PVC-coated, epoxy-coated, and project-specified finishes.

AREA CLASSIFICATION

Industrial and hazardous-area products selected against project zone and certification requirements.

Protection, enclosures, and lighting

Complete packages for grounding, lightning protection, equipment housing, and industrial illumination.

04 Earthing and lightning protection

- Grounding busbars, neutral bars and bonding components
- Compression and mechanical connectors
- Earth rods, plates, pits and inspection chambers
- Bare and covered copper or aluminium conductors
- Static discharge reels and flexible braids
- Air rods, bases, saddles, brackets and strike pads
- Lightning protection systems and components

05 Junction boxes and enclosures

- Aluminium, stainless steel and mild steel enclosures
- Polycarbonate, ABS and polyamide enclosures
- Ex-d flameproof and ex-rated enclosures
- Industrial control stations
- Switch racks and distribution panels
- Weatherproof and project-specific enclosure systems

06 Industrial and explosion-proof lighting

- Explosion-proof fluorescent and LED fittings
- Explosion-proof flood lights
- Reflector batten and weatherproof fittings
- Low-bay and high-bay LED fittings
- Octagonal, round stepped and conical lighting poles
- High masts, aluminium, decorative and smart poles

TYPICAL APPLICATIONS

HAZARDOUS AREAS

Refineries, tank farms, terminals, chemical plants, and process facilities.

OUTDOOR ASSETS

Utilities, substations, infrastructure, marine environments, and industrial yards.

BUILT FACILITIES

Plants, warehouses, workshops, control buildings, and maintenance areas.

Power, mechanical, and safety

Equipment and maintenance materials supporting plant operation, reliability, and workforce protection.

07 Switchgear and circuit protection

- Miniature circuit breakers - MCB
- Moulded-case circuit breakers - MCCB
- Air circuit breakers - ACB
- Contactors, relays, timers and motor protection
- Disconnectors and safety switches
- Distribution boards and control components
- Industrial plugs, sockets and accessories

08 Mechanical equipment and spares

- Pumps, motors, gearboxes and drives
- Valves, actuators, fittings and accessories
- Compressors and pneumatic systems
- Bearings, seals, gaskets and O-rings
- Hydraulic hoses, fittings and assemblies
- Fasteners, hardware and workshop consumables
- Lubricants, oils and industrial chemicals

09 Safety, firefighting, and site equipment

- PPE for head, eye, hand, foot, respiratory and fall protection
- Firefighting equipment and fire safety systems
- Gas detection, safety instruments and emergency equipment
- Welding, cutting and fabrication equipment
- Power tools, measuring tools and heavy-duty accessories
- Paints, coatings and surface protection products

SUPPLY SUPPORT

TECHNICAL MATCHING

Cross-reference review against model, rating, material, size, and operating conditions.

MAINTENANCE SPARES

Routine, shutdown, overhaul, and emergency requirements across multiple equipment families.

SAFETY COMPLIANCE

PPE and safety products aligned with project specifications and required certifications.

Automation, HVAC, and project materials

Technical supply across controls, instrumentation, refrigeration, fabrication, and built-asset requirements.

10 Instrumentation and automation

- Process instrumentation and control systems
- Sensors, transmitters, switches and controllers
- PLC, HMI, industrial communication and automation
- Measuring, testing and calibration instruments
- Actuation, motion and fluid-control technologies
- Data sheets, certificates and technical submittals

11 HVAC and refrigeration

- Compressors, service kits, oils and spare parts
- Refrigerants - R134a, R410a, R404a, R407c and HFO
- Copper pipes, fittings and insulation materials
- Condensers, evaporators, coils and heat exchangers
- Filter driers, sight glasses and solenoid valves
- Thermostats, controls and expansion valves

12 Structural and construction materials

- Structural steel and project materials
- Fabrication consumables and site hardware
- Workshop equipment and maintenance tools
- Pipes, fittings and mechanical bulk items
- Project-specific materials to approved specifications

PROJECT-SPECIFIC SOURCING

If a requirement sits outside the standard portfolio, our sourcing team can identify qualified manufacturers, validate compliance, and present an approved technical and commercial alternative.

Brands we source and supply

Access to globally recognized manufacturers through qualified distributors and project-specific supply channels.

ABB	Ansell	Atlas Copco	Bitzer
Bosch Professional	Bosch Rexroth	Castrol	Copeland
Danfoss	Dräger	Emerson	Embraco
Endress+Hauser	Enerpac	Festo	Fluke
Gates	Grundfos	Havells	Hilti
Honeywell	Ingersoll Rand	Legrand	Loctite / Henkel
Makita	MSA Safety	Nexans	Omega Engineering
Parker Hannifin	Pepperl+Fuchs	Prysmian	Schneider Electric
Siemens	SKF	3M	Tecumseh
Tyco / JCI	WEG	Yokogawa	

Brand availability, country of origin, authorization status, lead time, and warranty are confirmed against each RFQ. Equivalent brands are proposed only with clear technical disclosure.

Quality, compliance, and documentation

Materials are sourced against the applicable project specification, certification, and traceability requirements.

ATEX / IECEx

Hazardous-area equipment for explosive atmospheres.

API 6A / 6D

Valves and wellhead equipment to petroleum standards.

IEC 60068

Environmental testing for harsh industrial conditions.

NEMA / IP

Enclosure ratings for industrial and outdoor use.

ISO 9001:2015

Quality management criteria in supplier qualification.

ASME / ANSI

Piping, pressure, and structural material requirements.

DNV / CLASS

Marine and offshore approvals where specified.

IEEE / IEC

Electrical safety, ratings, and interoperability.

DOCUMENTATION PACKAGE - AS REQUIRED

- Certificate of Conformity
- Material Test Reports
- Manufacturer Data Record
- FAT / inspection reports
- Technical data sheets
- Country of origin
- Warranty documents
- Packing and shipping records

Corporate information and market ecosystem

A registered UAE entity supported by international sourcing relationships and industrial project exposure.

COMPANY INFORMATION

VAT TRN	105416051800003
AUTHORISED MANAGERS	Anwarudeen Mohamed Abdul Kader / Mohamed Asif Anwarudeen Saheera Beevi Anwarudeen
REGISTERED ADDRESS	Sharjah Media City, Al Messaned, Sharjah, UAE

PROCUREMENT DOCUMENTATION & SUPPORT

Company registration

Business licence, formation certificate and VAT registration copy.

Technical documentation

Data sheets, conformity certificates, material test reports and origin records are coordinated against each project requirement.

Commercial controls

Make, model, origin, lead time, warranty, delivery basis and deviations are defined in the quotation.

Project references and other supporting records are provided on request, subject to availability and release requirements.
